2010 John Borchert S American Metropolitan Evolution
Borchert's epochs refer to five distinct periods in the history of American urbanization and are also known as Borchert's model of urban evolution. Each epoch is characterized by the impact of a particular transport technology on the creation and differential rates of growth of American cities. This model was conceptualized by University of Minnesota geographer John R. Borchert in 1967.

DeVivo employs a historical narrative in offering a critical review of the most influential leaders in American academic geography during the twentieth century. Geographers with interest in the history of the discipline, as well as academic leaders and scholars in leadership, will appreciate this book.

Keener's commentary explores the Jewish and Greco-Roman settings of John more deeply than previous works, paying special attention to social-historical and rhetorical features of the Gospel. It cites about 4,000 different secondary sources and uses over 20,000 references from ancient literature.

Contemporary American society, with its emphasis on mobility and economic progress, all too often loses sight of the importance of a sense of "place" and community. Appreciating place is essential for building the strong local communities that cultivate civic engagement, public leadership, and many of the other goods that contribute to a flourishing human life. Do we, in losing our places, lose the crucial basis for healthy and resilient individual identity, and for the cultivation of public virtues? For one can't be a citizen without being a citizen of some place in particular; one isn't a citizen of

a motel. And if these dangers are real and present ones, are there ways that intelligent public policy can begin to address them constructively, by means of reasonable and democratic innovations that are likely to attract wide public support? Why Place Matters takes these concerns seriously, and its contributors seek to discover how, given the American people as they are, and American economic and social life as it now exists—and not as those things can be imagined to be in some utopian scheme—we can find means of fostering a richer and more sustaining way of life. The book is an anthology of essays exploring the contemporary problems of place and placelessness in American society. The book includes contributions from distinguished scholars and writers such as poet Dana Gioia (former chairman of the National Endowment for the Arts), geographer Yi-Fu Tuan, urbanist Witold Rybczynski, architect Philip Bess, essayists Christine Rosen and Ari Schulman, philosopher Roger Scruton, transportation planner Gary Toth, and historians Russell Jacoby and Joseph Amato.

A fully revised and updated new edition of the classic history of western America The newly revised second edition of this concise, engaging, and unorthodox history of America's West has been updated to incorporate new research, including recent scholarship on Native American lives and cultures. An ideal text for course work, it presents the West as both frontier and region, examining the clashing of different cultures and ethnic groups that occurred in the western territories from the first Columbian contacts between Native Americans and Europeans up to the end of the twentieth century.

The World of the American West is an innovative collection of original essays that brings the world of the American West to life, and conveys the distinctiveness of this diverse, constantly changing region. Twenty scholars incorporate the freshest research in the field to take the history of the American West out of its timeworn "Cowboys and Indians" stereotype right up into the major issues being discussed today, from water rights to the presence of the defense industry. Other topics covered in this heavily illustrated, highly accessible volume include the effects of leisure and tourism, western women, politics and politicians, Native Americans in the twentieth century, and of course, oil. With insight both informative and unexpected, The World of the American West offers perspectives on the latest developments affecting the modern American West, providing essential reading for all scholars and students of the field so that they may better understand the vibrant history of this globally significant, ever-evolving region of North America.

The Book of Martyrs by John Foxe written in the 16th century has long been the go-to source for studying the lives and martyrdom of the apostles. Whilst other scholars have written individual treatments on the more prominent apostles such as Peter, Paul, John, and James, there is little

published information on the other apostles. In *The Fate of the Apostles*, Sean McDowell offers a comprehensive, reasoned, historical analysis of the fate of the twelve disciples of Jesus along with the apostles Paul, and James. McDowell assesses the evidence for each apostle's martyrdom as well as determining its significance to the reliability of their testimony. The question of the fate of the apostles also gets to the heart of the reliability of the kerygma: did the apostles really believe Jesus appeared to them after his death, or did they fabricate the entire story? How reliable are the resurrection accounts? The willingness of the apostles to die for their faith is a popular argument in resurrection studies and McDowell offers insightful scholarly analysis of this argument to break new ground within the spheres of New Testament studies, Church History, and apologetics.

How do we make sense of Ezekiel 40–48? Ezekiel's temple vision has long mystified Bible readers and scholars. Is this a temple that is going to be built in the future? Or is this merely symbolic? Why so many details? Is there any relevance to this section of the Old Testament at all? This book addresses these important questions, showing how Ezekiel's temple is more than just symbolic. Yet its ultimate fulfillment is not in any physical building, but, according to the New Testament, in Jesus and the new heavens and new earth. Not only will this book illuminate Ezekiel 40–48 for you, it will also help you understand important issues of interpretation in our day, such as typology, the role of the temple in biblical theology, and the New Testament use of the Old Testament. You will learn that yes, in fact, Ezekiel 40–48 is very relevant to the Bible's storyline.

Extending a hundred miles across south-central Ontario, Toronto is the fifth largest metropolitan area in North America, with the highest population density and the busiest expressway. At its core old Toronto consists of walkable neighborhoods and a financial district deeply connected to the global economy. Newer parts of the region have downtown centers linked by networks of arterial roads and expressways, employment districts with most of the region's jobs, and ethnically diverse suburbs where English is a minority language. About half the population is foreign-born—the highest proportion in the developed world. Population growth because of immigration—almost three million in thirty years—shows few signs of abating, but recently implemented regional strategies aim to contain future urban expansion within a greenbelt and to accommodate growth by increasing densities in designated urban centers served by public transit. *Toronto: Transformations in a City and Its Region* traces the city's development from a British colonial outpost established in 1793 to the multicultural, polycentric metropolitan region of today. Though the original grid survey and much of the streetcar city created a century ago have endured, they have been supplemented by remarkable changes over the past fifty years in the context of economic and social globalization. Geographer Edward Relph's broad-stroke portrait of

the urban region draws on the ideas of two renowned Torontonians—Jane Jacobs and Marshall McLuhan—to provide an interpretation of how its current forms and landscapes came to be as they are, the values they embody, and how they may change once again.

Based on the John 3:16 Conference of 2008, this book presents essays that offer an alternative to Calvinism in regard to understanding how God works in salvation.

For two millennia calling oneself a Jew and confessing Jesus-Christ was perceived as nonsense. This is no longer the case. Jewish believers in Christ - "Messianics", Catholics, Orthodox, and so forth - are now reclaiming their Jewish identity. Jewish Church is about imagining what their home in the Church would look like.
