Japanese Abacus and Mental Arithmetic (JAMA) is a unique Japanese Abacus educational programme that teaches abacus and mental Arithmetic for children as well as adults in the UK. Abacus is the English word for the Japanese soroban. This traditional tool is being used all over the world as a fantastic

Where To Download Abacus And Mental Arithmetic Model Paper

teaching method for primary education to teach the fundamentals of mathematics and develop impressive mental calculation ability among children.

Japanese Abacus

The abacus system of mental calculation is a system where users mentally visualize an abacus to do calculations. No physical abacus is used; only the answers are written down. Calculations can be made at great speed in this way.

Mental Abacus - Memory Techniques Wiki

Where To Download Abacus And Mental Arithmetic Model Paper

Abacus-Mental Arithmetic first involves learning how to use the abacus to do addition and subtraction sums. Equipping with the knowledge of using the abacus to solve arithmetic sums, they will learn how to visualise the movement of the beads in their minds. Using this imagination, they will gradually learn to solve addition, subtraction, multiplication and division sums mentally at a fast speed.

faq | Fun With Abacus

Soroban is the name of Japanese abacus which has 1 beads on the higher deck and 4 beads on

Where To Download Abacus And Mental Arithmetic Model Paper

the lower deck. It is modified from the ancient Chinese abacus. The ancient Chinese abacus had 2 beads on the higher deck and 5 beads on the lower deck - this is referred to as the 2:5 system. By manipulating the beads, complex arithmetic calculations such as addition, subtraction, multiplication, division and finding the square root could be carried out efficiently and accurately.

Soroban Abacus is the traditional Japanese model of Abacus used for performing basic arithmetic operations. Apart from this model, a Chinese version of Abacus was used in ancient times which was called as Saunpan Abacus. The Suanpan is a horizontally structured Abacus that has 2 blocks. The upper block constitutes 2 beads and lower block constitutes 5 beads in each rod. Soroban is a horizontally structured Abacus that has 2 blocks.
