Creighton Buck has presented another pathway to topics in Advanced Calculus. This is a valuable addition to the literature of calculus. Technically, lying between Angus Taylor's (elementary) Advanced Calculus and Loomis and Sternberg's (abstract) Advanced Calculus. As a stepping-stone to other (more advanced) tomes, Buck is priceless.

We examine a commonly suggested proof construction strategy from the mathematics education literature—that students first produce a graphical argument and then work to construct a verbal-symbolic proof based on that graphical argument. The work of students who produce such graphical arguments when solving proof construction tasks was analyzed to distill three activities that contribute to ...
