The effective ward management depends upon the technical skills and ability of the ward sister. Another important fact about the ward management is, ward is a matrix organization, a very complex organization. It is to be managed on the principles of a project management. The ward sister is under the dual Command, at one hand she is under the command of the physician in—charge of the ward/department at other hand she is under the command of nursing superintendent. This makes management of ...

The majority of trauma nursing education is focused on the emergency phases of care. We describe the development and evaluation of a trauma eLearning module for the ward environment. The module was developed using adult learning principles and implemented in 2 surgical wards. There were 3 phases of evaluation: (1) self-efficacy of nurses; (2) relevance and usability of the module and; (3) application of knowledge learnt.

Evaluation and Management of Right-Sided Heart Failure: A Scientific Statement From the American Heart Association Circulation . 2018 May 15;137(20):e578-e622. doi: 10.1161/CIR.0000000000000560.

The evaluation of IT and its business value are the subject of many academic and business discussions. Investments in IT are growing extensively, and business managers worry about the fact that the benefits might not be as high as expected. This phenomenon is often called the IT investment paradox or the IT Black Hole: large sums are invested in IT that seem to be swallowed by a large black hole without rendering many returns. How to measure the benefits of IT is the concern of this book titled Information Technology Evaluation Methods and Management. The different IT evaluation approaches and methods are discussed and illustrated with cases: traditional financial evaluations such as the return on investment, information economics and the recently introduced IT Balanced Scorecard. The latter approach is proposed as an ideal mechanism to support the IT/business alignment process and its related IT governance process. Among some of the topics included in this book are: software measurement; ERP project evaluation; strategic electronic commerce evaluation.

Investments in IT are growing extensively and business managers worry about the fact that the benefits of IT investments might not be as high as expected. Information Systems Evaluation Management discusses this issue among others, through its presentation of the most current research in the field of IS evaluation.
