Perimeter of a Square A square is a 4-sided polygon in which all the sides are the same length. Therefore, to find the perimeter of a square, we have only to multiply one side by 4. The formula for the area of a square is $4 \times s$, where s is the length of a side. For example, the perimeter of the square below is $4 \times 8 = 32$: Perimeter of a Square

Geometry Notes Perimeter and Area Page 6 of 57 the process of calculating the area, we multiplied units times units. This will produce a final reading of square units (or units squared). Thus the area of the figure is 112 square units. This fits well with the definition of area which is the number of square units that will cover a closed figure.
