writer) – of speaking
“ truth to power, ”
and also the
importance of tracing
the “ affiliations ” of
a text and its
embeddedness in the
world. This approach
is not incompatible
with Jung ’ s theory
of the ‘ great ’ artist
and his capacity to
answer the deep-

the verge of a major shift in consciousness rooted in a new understanding of how our DNA operates - namely that it is programmed directly by the way we think and feel. This is a highly ambitious and sophisticated system for shaping one's destiny. Based around 64 archetypes, it

resembles the I Ching in its vast scope and profound importance, and in the resonant character of its symbolism. The author shows how there are two ways to approach the Gene Keys - the analogue (holistic) way and the digital (detailed) way. It is the combining of both analogue and

digital that results in
contemplation - the
primary pathway into
the Gene Keys. Since
