The STABLE Program is a neonatal education program that focuses on the post-resuscitation/pre-transport stabilization care of sick newborns. This learner manual serves as a student handbook for either self-study or instructor-led presentations. It includes more than 220 pages, illustrated in full color.

This popular book covers the “how-to” of the respiratory care of newborns in outline format. It includes case studies for self-review and is illustrated with high quality radiographic images, figures, tables, and

Learning The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery. NRP Essentials and NRP Advanced The NRP, 8th edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. New in the 8th edition Key Points at the beginning of each lesson. Quick Response (QR) codes that enable the reader to view short videos about the topics on their mobile device. Lesson Review Questions grouped together at the end of each lesson. Quality Improvement Opportunities and Frequently Asked Questions in each

Lesson. New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect. Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance.

Developed by the leading experts in neonatal simulation, this innovative new resource delivers neonatology health care providers and educators essential guidance on designing, developing, and implementing simulation-based neonatal education programs. The early chapters cover learning theory, fundamentals of scenario design, and simulation and the Neonatal Resuscitation Program*. The

later chapters cover specific applications of simulation in neonatology and debriefing techniques. The book walks the reader through scenario design, mannequins and task trainers, moulage, simulation techniques, virtual simulations, mannequin adaptations needed to conduct specific simulation procedures, debriefing methods, and more. Step-by-step images walk the reader through adapting mannequins to simulate procedures and how to replicate body fluids and conditions commonly encountered in newborns. With 225+ color images, as well as plenty of helpful boxes and tables throughout, the book will be useful to both novice and expert. More than 30 chapters include In situ simulation Simulation and the Neonatal Resuscitation Program Mannequins and Task Trainers Boot Camps Debriefing in Simulation-based Training Simulation Operations And
