OSHA Publication 3221, (2004). Concrete is one of the most widely used construction materials in the world. Safety issues exist in all phases of concrete production, including the manufacture of portland cement and pre-cast concrete products, as well as during the use of concrete in construction. This page was developed with input from OSHA's Alliance Program and Strategic Partnership Program participants.

There are several steps precasters must take to protect workers from beryllium exposure and comply with OSHA's final rule. By Mason Nichols. In 2018, the Occupational Safety and Health Administration began enforcing a new permissible exposure limit (PEL) for crystalline silica. 1 The revised limit was well publicized as it halved the PEL from 100 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) to 50 ...
