This present work by the Lipsons is an expanded version of the great 1969 classic by Henry Lipson and Stephen Lipson of the old Manchester Institute of Science and Technology, the first book to explain clearly the modern approach to the optics of diffraction and interference. In this regard it has never been excelled.

Optical Physics is written for the advanced undergraduate student to learn optical physics as if sitting in the classroom of a master educator. A given topic is laid out in multiple ways enabling the student a greater opportunity to develop a physical intuition for the material. The 4th edition chapter summaries and side discussions in the margins once again are added to make the textbook ...
