Health plans for over 50 illnesses and conditions most commonly encountered in the home. Each plan lists nursing diagnoses, short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses.

Appendices on documentation guidelines, laboratory values, medication administration, home care resources, and standard precautions provide quick access to useful home care information. Related OASIS items are identified in the assessment section, and ICD-9 diagnostic codes in the care plans section assist with proper home care documentation. Visit frequency and duration schedules are suggested within each care plan to assist nurses in evaluating and planning care. NANDA nursing diagnoses are consistent with the latest 2001-2002 nomenclature. An increase in suggested therapy referrals within the care plans and in a new appendix helps nurses identify indicators for specialized services. A fully updated Resources Appendix includes websites for easy access to home health service information.

Handbook of Home Health Care, Fifth Edition has been completely revised and updated to provide up-to-date, specific, authoritative guidance for the successful administration and management of home health care agencies. An excellent, comprehensive text, this Handbook addresses detailed legal and legislative issues, case management processes, and state-of-the-art technology.

Individuals with disabilities, chronic conditions, and functional impairments need a range of services and supports to keep living independently. However, there often is not a strong link between medical care provided in the home and the necessary social services and supports for independent living. Home health agencies

Health and others are rising to the challenges of meeting the needs and demands of these populations to stay at home by exploring alternative models of care and payment approaches, the best use of their workforces, and technologies that can enhance independent living. All of these challenges and opportunities lead to the consideration of how home health care fits into the future health care system overall. On September 30 and October 1, 2014, the Institute of Medicine and the National Research Council convened a public workshop on the future of home health care. The workshop brought together a spectrum of public and private stakeholders and thought leaders to improve understanding of the current role of Medicare home health care in supporting aging in place and in helping high-risk, chronically ill, and disabled Americans receive health care in their

Health communities. Through presentations and discussion, participants explored the evolving role of Medicare home health care in caring for Americans in the future, including how to integrate Medicare home health care into new models for the delivery of care and the future health care marketplace. The workshop also considered the key policy reforms and investments in workforces, technologies, and research needed to leverage the value of home health care to support older Americans, and research priorities that can help clarify the value of home health care. This summary captures important points raised by the individual speakers and workshop participants.

make the individual a good home health aide. The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The second section is a good aide or good training tool for practical demonstration purposes. For the purpose of understanding only, a home health aide does not have to be a Certified Nurses Aide. As a result this book can be used to train and prepare an individual to function in the capacity of a home health aide. The agency must prepare a set of standardized tests for the aides to ensure that the individual have fully internalized the reaching and training that they have been put through. This book further addresses the rule and regulation (federal and State) that the home health aide must be familiar with. This book is an excellent tool for the home health aide. I strongly
