This test bank of close to 2,000 questions helps instructors design a variety of tests and quizzes. The test bank includes text-based and art-based questions. Each test item in the Test Bank has been tagged with a corresponding Learning Outcome from this textbook as well as a Bloom's taxonomy ranking, allowing instructors to test students on a range of learning levels. This supplement is the print version of the Test Bank in TestGen® and Microsoft® Word formats that is in the Instructor Resources DVD package. This supplement is also available in MicrosoftWord format on the Instructor Resource DVD package and in the Instructor Resources area of MasteringA&P.

Understanding Anatomy and Physiology, 3rd Edition organizes a seemingly huge volume of information into manageable sections to make these complex concepts easy to understand and remember.

Essential Clinical Anatomy, Third Edition, Image and Test Bank includes all of the 627 figures from the book in JPEG format to import into PowerPoint and other programs. The user can find images through the Table of Contents or search by figure number or terms used in labels. Two versions of each image are provided: with labels and without labels and leaders. A 500-question Test Bank is also included.

Perfect for introductory level students, Hole's Human Anatomy and Physiology assumes no prior science knowledge by focusing on the fundamentals. This new edition updates a great A&P classic, while offering greater efficiencies to the user including the tried and true Learn, Practice, Assess method throughout the text. The 16th edition focuses on helping students master core themes in anatomy and physiology, which are distilled down into key concepts and underlying mechanisms. A new author team who is active in the classroom brings career relevance and more concise language, while updated and enhanced figures provide clarity.

Thoroughly revised for the Fifth Edition, the Test Bank has more than 3,000 questions with up to 600 new and every question has been accuracy checked by an M.D. and A&P instructor. Questions have been revised based on actual student and instructor feedback and results in MasteringA&P®. Question types include figure labeling, fill-in-the-blank, matching, true/false, multiple choice, and clinical application questions.
