The SE error usually appears on Samsung washing machines display when the program has already finished washing and the washer should start the laundry rinse cycle. At this point, according to the program, the machine should drain the dirty soapy water, after washing the laundry. Then, the appliance pours clean water for rinsing.

~~Samsung washer error code SE | Causes, How FIX Problem~~

If your washing machine does not rotate the drum but displays the SE error, you need to check the control unit. In the event of a breakdown, it is not difficult to replace the unit. It is more complicated to repair the control board, solder the contacts and clean the tracks. So, we recommend you to contact the service center. ~~Samsung Washing Machines | View Range | Samsung UK~~

We've got machines ranging from 800rpm to 1600rpm. The more revolutions per minute (rpm) the faster the drum rotates during a spin cycle. Washing machines with faster spin speeds take out more moisture, so your clothes won't be as wet when you take them out of the machine. You should always opt for the highest spin speed your budget allows.

To use a washing machine, start by choosing a wash cycle, like normal or delicate, depending on the kind of clothes you're washing. Then, select a water temperature. The hotter the water, the cleaner your clothes will get, but you should use cold water for delicates or clothes with dyes that might bleed.
